INDEX OF SUBJECTS

PAGE

Acinetobacter calcoaceticus, biological activities of the lipopolysaccharide and lipid from 211
Acinetobacter calcoaceticus, identification of a new lipopolysaccharide antigen: occurrence of widespread natural antibody 203
Acne, resistance of propionibacteria to antibiotics used in treatment 271
Adherence to human uroepithelial cells and haemolysin production by *Escherichia coli*, effect of four antibiotics 341
Adhesins and fimbriae of *Proteus mirabilis* strains associated with high and low affinity for the urinary tract 427
Adhesion of *Salmonella typhimurium* to HEp2 and HeLa cells, role of haemagglutinins . 371
Anaerobic bacteria, susceptibility to beta-lactam antibiotics and beta-lactamase production 75
Aspergillus fumigatus, use of mycelial antigens in enzyme-linked immunosorbent assay and counter-immunoelectrophoresis 97
Auxotyping of *Neisseria gonorrhoeae* isolated in the United Kingdom 295
Azlocillin, ticarcillin and cefsulodin, the response of *Pseudomonas aeruginosa* 351

Bacteroides fragilis, separation of capsulate and non-capsulate strains on a discontinuous density gradient 239
Beta-lactam antibiotics and beta-lactamase production, susceptibility of anaerobic bacteria 75
Blood cultures, clinical comparison of glucose broth with nutrient broth blood cultures for detection of "*Streptococcus viridans*" bacteraemia 497
Bloodstream and gingival crevice of man, streptococci isolated from 263
BOOKS RECEIVED
Radioimmunoassay of antibody and its clinical applications (D. Parratt, H. McKenzie, K. H. Nielsen and S. J. Cobb) 107
Mycobacterial diseases (J. M. Grange) 107
Developments in antibiotic treatment of respiratory infections (R. van Furth) . . . 108
Hospital acquired infection: principles and prevention (G. A. J. Ayliffe, B. J. Collins and Lynda J. Taylor) 109
Microbes, man and animals. The natural history of microbial interactions (A. H. Linton) 110
β-lactam antibiotics. Mode of action, new developments and future prospects (M. Salton and G. D. Shackman) 243
Antibiotics of the beta-lactam group (D. Greenwood) 243
Safe handling of microorganisms. A camera talks production (Camera Talks Ltd) . 244
Significance of medical microbiology in the care of patients (edited by V. Lorian) . . 386
Handbook of medical parasitology (V. Zaman and Loh Ah Keong) 387
Cell wall-deficient bacteria—basic principles and clinical significance (edited by G. J. Domingue) 387
The destruction of the bacterial spore (A. D. Russell) 388
Anaerobic infections (A. T. Willis and K. D. Phillips) 389
Fungal infection in the compromised patient (edited by D. W. Warnock and M. D. Richardson) 389
Immunofluorescence techniques in diagnostic microbiology (edited by Joan M. B. Edwards, C. E. D. Taylor and A. H. Tomlinson) 390
The pathogenesis of infectious disease (C. A. Mims) 503
Principles and practice of disinfection, preservation and sterilisation (edited by A. A. Russell, W. B. Hugo and G. A. J. Ayliffe) 503
Laboratory-acquired infections (C. H. Collins) 504
Bordetella pertussis, serum IgA antibody as an indicator of infection 417

Campylobacter auto-agglutination, the role of DNA and bacteriophage 333
Candidosis, oral, experimentally induced in the rat, role of iron deficiency 363
Cefsulodin, azlocillin and ticarcillin, the response of *Pseudomonas aeruginosa* 351
Chloramphenicol-resistance plasmids, relatedness in epidemiologically unrelated strains of pathogenic *Escherichia coli* from man and animals 165

PAGE

Clostridium bifermentans, *Clostridium sporogenes* and *Peptostreptococcus anaerobius*, effect of glucose concentration in growth medium upon neutral and acidic fermentation end-products 61
Clostridium perfringens enterotoxin, detection by tissue culture and double-gel diffusion methods 233
Complement pathways, classical and alternative, relative importance in serum bactericidal activity against *Escherichia coli* 69
Coxsackie B viruses, indirect enzyme-linked immunosorbent assay (ELISA) for detection of IgG antibodies 459
Cystic fibrosis, bactericidal activity of serum from patients for *Pseudomonas aeruginosa* 401

Escherichia coli, distribution and transferability of plasmids in trimethoprim-resistant urinary strains 433
Escherichia coli, effect of four antibiotics on haemolysin production and adherence to human uroepithelial cells 341
Escherichia coli, faecal carriage of aerobic gram-negative bacilli and drug resistance in different age-groups in Dutch urban communities. 139
Escherichia coli K antigens and virulence in urinary-tract infection: studies in a mouse model 147
Escherichia coli, relatedness of chloramphenicol-resistance plasmids in epidemiologically unrelated strains from man and animals 165
Escherichia coli, relative importance of classical and alternative complement pathways in serum bactericidal activity against 69

Faecal carriage of aerobic gram-negative bacilli and drug resistance of *Escherichia coli* in different age-groups in Dutch urban communities. 139
Fimbriae and adhesins of *Proteus mirabilis* strains associated with high and low affinity for the urinary tract 427

Gardnerella vaginalis, identification of 83
Gastroenteritis in Nigeria, isolation of *Yersinia* species from patients 93
Gingival crevice and bloodstream of man, streptococci isolated from 263
Glucose concentration in growth medium, effect upon neutral and acidic fermentation end-products of *Clostridium bifermentans*, *Clostridium sporogenes* and *Peptostreptococcus anaerobius* 61

Haemagglutinins and adhesion of *Salmonella typhimurium* to HEp2 and HeLa cells . . 371
Haemolysin production and adherence to human uroepithelial cells by *Escherichia coli*, effect of four antibiotics 341
Haemophilus, aspects of the pathogenicity of some oral and other haemophili 467
Haemophilus influenzae, scanning electron microscopy of interaction with organ cultures of rat trachea 477
HeLa-cell surface, interaction with *Yersinia pseudotuberculosis* 245
Hepatitis B, comparison of enzyme immunoassay with radioimmunoassay for detection of surface antigen 111
Hepatitis B surface antigenaemia, duration and correlation with histopathological and clinical outcome in acute and chronic hepatitis. 227
Herpes zoster, virological course in otherwise normal hosts 303
Histocompatibility antigens (HLA), association with nasal carriage of *Staphylococcus aureus* 215

Inhibitor production by group-G streptococci of human and animal origin 409
Iron deficiency, role in experimentally induced oral candidosis in the rat. 363

Macrophages, how they kill tubercle bacilli 1
Meningococcal serotype 2a protein, immunogenic and protective properties in the hen-embryo model 443
M protein, its relationship with opacity factor in *Streptococcus pyogenes* 13
Mycelial antigens of *Aspergillus fumigatus*, use in enzyme-linked immunosorbent assay and counter-immunoelectrophoresis 97
Mycobacterium avium and related mycobacteria, pathogenicity for experimental animals 27
Mycobacterium, how macrophages kill tubercle bacilli 1

PAGE

Neisseria gonorrhoeae, auxotyping of strains isolated in the United Kingdom 295
Neisseria gonorrhoeae, non-cultural detection in cervical and vaginal washings. . . . 183
Neisseria meningitidis serotype 2a protein, immunogenic and protective properties in the hen-embryo model 443

Opacity factor, its relationship with M protein in *Streptococcus pyogenes* 13
Ornithine decarboxylase, gain of activity by a strain of *Shigella flexneri* serotype 6 on the introduction of an R plasmid 381

PATHOLOGICAL SOCIETY OF GREAT BRITAIN AND IRELAND
Proceedings of 146th meeting . . . . . i (after 244)
Proceedings of 147th meeting . . . . . (after 513)
Penicillinase production, correlation with phage type and susceptibility to antibiotics and heavy metals in *Staphylococcus aureus* 391
Peptostreptococcus anaerobius, *Clostridium bifermentans* and *Clostridium sporogenes*, effect of glucose concentration in growth medium upon neutral and acidic fermentation end-products 61
Phagocytosis of *Trypanosoma brucei rhodesiense* by peritoneal macrophages: a study by electronmicroscopy 157
Polymorphonuclear leukocytes, effect of low intraphagolysosomal *p*H on antimicrobial activity of antibiotics against ingested staphylococci 309
Propionibacteria, resistance to antibiotics used in the treatment of acne 271
Proteus mirabilis, adhesins and fimbriae of strains associated with high and low affinity for the urinary tract 427
Proteus mirabilis and *Proteus vulgaris*, a highly discriminatory multi-typing scheme . . 193
Proteus mirabilis, purification, structure and synthesis of proticine 3 323
Proteus morgani is less frequently associated with urinary-tract infections than *Proteus mirabilis*—an explanation 317
Proteus vulgaris and *Proteus mirabilis*, a highly discriminatory multi-typing scheme . . 193
Proticine 3, purification, structure and synthesis 323
Pseudomonas aeruginosa, bactericidal activity of serum from patients with cystic fibrosis 401
Pseudomonas aeruginosa, response to azlocillin, ticarcillin and cefsulodin 351

Salmonella typhimurium, haemagglutinins and adhesion to HEp2 and HeLa cells . . . 371
Shigella flexneri, role of heat-labile antigens in HeLa-cell invasion 37
Shigella flexneri serotype 6, gain of ornithine decarboxylase activity by a strain on the introduction of an R plasmid 381
Staphylococcal infection, occurrence of antibodies to teichoic acid in patients with diseases other than 45
Staphylococci, ingested, effect of low intraphagolysosomal *p*H on antimicrobial activity of antibiotics against 309
Staphylococcus aureus, association between histocompatibility antigens (HLA) and nasal carriage 215
Staphylococcus aureus, correlation of penicillinase production with phage type and susceptibility to antibiotics and heavy metals 391
Staphylococcus aureus, gentamicin- and methicillin-resistant strains in Dublin hospitals: clinical and laboratory studies 117
Staphylococcus aureus, gentamicin- and methicillin-resistant strains in Dublin hospitals: molecular studies 129
Staphylococcus aureus, identification by pyrolysis gas-liquid chromatography 483
Streptococci, group-G, inhibitor production by strains of human and animal origin . . 409
Streptococci isolated from the bloodstream and gingival crevice of man 263
Streptococcus, group-B type II, isolation and immunochemical characterisation of a cell-wall carbohydrate and a membrane lipocarbohydrate antigen 53
Streptococcus pyogenes, relationship between opacity factor and M protein 13
"*Streptococcus viridans*", clinical comparison of glucose broth with nutrient broth blood cultures for detection of bacteraemia 497

Teichoic acid, occurrence of antibodies in patients with diseases other than staphylococcal infection 45
Ticarcillin, azlocillin and cefsulodin, the response of *Pseudomonas aeruginosa* 351

PAGE
Tinea versicolor, incidence in central Sweden 501
Treponema pallidum, effect of serum concentration and metabolic inhibitors on attachment to rabbit cells 281
Trimethoprim-resistant urinary *E. coli*, distribution and transferability of plasmids . . 433
Trypanosoma brucei rhodesiense, phagocytosis by peritoneal macrophages: a study by electronmicroscopy 157
Tubercle bacilli, how they are killed by macrophages 1

Urinary bacterial flora in patients with three types of urinary-tract diversion 221
Urinary-tract infection, K antigens and virulence in a mouse model 147
Urinary-tract infections are less frequently caused by *Proteus morgani* than by *Proteus mirabilis*—an explanation 317

Vaginal secretions, characteristics of motile curved rods in 175

Yersinia pseudotuberculosis, interaction with the HeLa-cell surface 245
Yersinia species, isolation from patients with gastroenteritis in Nigeria 93
